Niagara County Federation of Conservation Clubs October 2006 Minutes

Pledge to the Flag

Niagara County Federation of Conservation Club October 2006 Meeting held on the 23rd. Called to order at 7:00p.m. by President John Butcher at the 4-H Bldg., Lockport, New York with the Pledge to the Flag.

Guest Speakers: LT. Matt Pestinger, ECO R.J. Peinkofer, ECO D.C. DiPasquale, ECO R. Thompson and ECO J.R. Schultz

1. The Division of Law Enforcement is responsible for enforcing all of New York's Environmental Conservation Laws. As the uniformed law enforcement representative, the ECO is the person in the field, responsible for the enforcement of the environmental laws and regulations of New York and for the detection and investigation of suspected violations.

2. There is an issue in Albany. They have finally got a two-year contract, but with that it turns out that Robert T. Lucas director of law enforcement in Albany is paid less than the Captains. The staff in Albany decided they are not going to work for less. The director has given the commissioner and the deputy commissioner a date he will no longer be director. He requested we write a letter for the Director of Law Enforcement.

3. If you want any presentations on ATV's, snowmobiles and boats, anything law enforcement related and sportsmen education call Lt. Matthew Pestinger at (716) 765-2659.

4. To report a violation you can do it by email or talk directly to their dispatcher at 1-877-457-5680. They are more familiar with conservation violations than the State Police.

5. Many questions were asked of the delegates and some of the answers were:

A. Although advertised on television any baiting of deer is illegal. These substances are legal to buy such as salt licks but are illegal to use.

B. All wild white-tailed deer taken within the Region 6 CWD containment area of Oneida and Madison Counties during any open hunting season must be submitted for examination by a DEC biologist before you can bring it back to Niagara County.

C. If you buy a lifetime license for your children they must take a hunter safety course before they can obtain the license.

D. The computerized license system is a useful good system. The ECO can mail call and find out what area they have preference for by using Nextel. If you do not have a license with you they can call in immediately to find out if you have one. The paper system is a piece of garbage. The ink rubs off the license and all hunting licenses are green in color. For instance if they went to a visible

fishing licenses you could not tell the year from any distance, since licenses are no longer color coded.

E. The reason you see NYSDEC vehicles at CWM is that beside their fish & game duties they are responsible for solid waste pollution control duties include inspecting landfill operations to ensure compliance with regulations.

F. Diesel trucks are only allowed to idle for five minutes or the operator is subject to a fine. This does not apply to farm equipment, only to trucks.

G. Niagara County judges are good at fining and sentencing violators.

H. You can carry your handgun exposed all times while hunting. Carrying concealed has nothing to do with the conservation law and only applies to the penal law.

I. It is perfectly legal to walk down the road with a loaded gun. You can't shoot from highway but can cross highway with loaded gun. It is not legal to fire across the road.

J. You cannot shoot crippled ducks while your boat is under power. Your gun must be unloaded while the motor is running.

K. The Department of Environmental Conservation's Division of Law Enforcement offers an environmental awareness out-reach program entitled Environmental Awareness Gives Life to the Eco-System (EAGLES). The Program is developed for sixth and seventh grades and is administered by the Environmental Conservation Officers (ECO's). To see about how you can get this program started in your school, contact the regional DEC office in your area and speak to the ECO in charge.

1. The United States Coast Guard plans to locate M-240B machine gun training ranges called “Safety Zones” on all the Great Lakes. They have designated 34 areas in the Great Lakes as permanent target ranges for practice with live ammunition. They are strung around the perimeter of all five Great Lakes (Lake Michigan, Lake Superior, Lake Ontario, Lake Erie, and Lake Huron). Concerns with the plan have been raised by Sportsmen who are dubious of the Coast Guard’s claims that dumping lead bullets into the lakes each year will have no adverse impact on fish, birds, mammals, plants, or humans. The Ninth Coast Guard District is holding public meetings about its plans. The next public meeting is October 30, 2006 at the Rochester Fast Ferry Terminal, 1000 N. River Street, Rochester, NY. 4:00 p.m. to 5:30 p.m. - Open house. The public can receive information on the proposed zones and ask Coast Guard officials’ questions.

5:30 p.m. to 8 p.m. - Public meetings. After a brief statement by Coast Guard officials, the public can comment. Comments from citizens at the public meeting on the proposed rule will be limited to 2 minutes each to ensure that there is time to receive as many comments as possible. Comments will be recorded and entered into the docket for this rulemaking.
